### DETAILED ACTION

1. Applicant is advised that the Notice of Allowance mailed is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.
2. The indicated allowability of claims 1, 3-4, 15, 17-20 and 22-23 is withdrawn in view of the newly discovered reference(s) to Kajiya et al (U.S. Patent No. 5,864,342). Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2671

4. Claims 1, 3-4, 15, 17-20 and 22-23 is rejected under 35 U.S.C. 102(e) as being anticipated by Kajiya et al (U.S. Patent No. 5,864,342).

As per claims 1 and 20, Kajiva et al teach a method and system for rendering graphical objects to image chunks comprising a step of dividing a geometry buffer into a plurality of screen bins (col.10, lines 35-42, i.e., chunks), a step of storing primitives in each screen bin containing a portion of the primitive (col.15, lines 59-64 and col.16, lines 1-2), a step of rendering the screen bins, by row from top to bottom, into the pixel frame buffer (col.8, lines 45-49; col.41, lines 22-27) and a step of displaying at least one rendered screen bin before the rendering of all the screen bins has completed for the single pixel frame buffer (col.60, lines 24-17, 63-67 and col.61, lines 11-13).

As per dependent claims 3 and 22, Kajiya et al further teach a step of initiating the displaying of the screen bins rendered after at least one row of screen bins has completed rendering (col.61, lines 11-13).

As per dependent claims 4 and 23, Kajiya et al further teach a step of using a hardware interlock to ensure that the rendering step does not advance of the display step (Fig.22, 748).

Claims 15 and 17 are the system claims which perform those steps cited in the method claims 1 and 3, respectively, thus they are rejected under a similar rationale.

As per dependent claim 18, Kajiya et al further teach the claimed features at col.15, lines 59-67.

As per dependent claim 19, Kajiya et al further teach the claimed features at col.61, lines 5-13).

Art Unit: 2671

***Allowable Subject Matter***

5. Claims 10-14 are allowed.
6. Claims 2, 5-9, 16 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
